### The great Echo360 crash of November 3<sup>rd</sup>

The resemblance between individuals in this story and any real persons is purely coincidental.

It's an average Friday night at the Buttery. Han Smellig-Dith is simultaneously serving drinks and playing board games. There is a light buzz of chatter and laughter in the air, and a warm feeling of community flows through all.

Clake Burtis is studying studiously, listening to chemistry lectures, when suddenly the lecturer stops. 'Maybe he died?' Clake wonders. 'Does this mean that there are no more lectures?' He ponders gleefully, 14 weeks behind.

But as the web browser crashes, he realises the unthinkable has happened. Echo360 has crashed. Was it too much traffic from cramming students? Was it a cruel trick by lecturers punishing disorganised students? It is all pointless conjecture.

Kally Emp felt the effects of the cyber-attack first hand. "I'd been studying for my law exam all day – did you know I do law? – and, like, it just crashed! I didn't know what to do? If I can't listen to Thilan Dampapillai's dulcet tones, how will I ever get to sleep?" Stories like this rang through the corridors of SA5, as the effects of the crash devastated all attempts to cram.

Fortunately, Echo began working again Saturday morning, and the crash was soon forgotten amid mounting stress and snapchatting about this to friends back home.

Look after each other this exam period!
