RIDDLE OF THE WEEK

An unlucky Bruce resident has once again lost the lunchtime lottery as he accidentally sat down at a table filled with prospective IB runners for the fourth time in a row. Douglas (name changed for privacy reasons) has now heard the story of that time the runners got lost, the other story of that time the runners got lost again, another story about how the runners ran up a big mountain and then down the other side, and that story about how one of the runners rolled his ankle once.

“If I was any more bored I would probably pass away on the spot” grumbled Douglas. “No other universities in Australia have this unhealthy obsession with running, but everyone at ANU is addicted to it. They don’t even do runs with nice views, they just stumble along in the dark for hours on end and convince themselves they’ve had fun. Why bother?”

While Douglas’ views strike a chord with many people, the relevant authorities have confirmed that he is incorrect and probably came to hold these reservations about IB because he’s a massive sook.

“Mate, I bet he hasn’t even run 10km in his life” crowed one of the IB coaches during an interview with the Billetin. “Check his Strava, if he didn’t record the run then it didn’t happen.”

The interview was then concluded so the coach could run laps around the Quad to boost his kilometres for the week.

A group of campers have been on vacation so long, that they've forgotten the day of the week. The following conversation ensues.

Darryl: What's the day? I dont think it is Thursday, Friday or Saturday.

Tracy: Well that doesn't narrow it down much. Yesterday was Sunday.

Melissa: Yesterday wasn't Sunday, tomorrow is Sunday.

Ben: The day after tomorrow is Saturday.

Adrienne: The day before yesterday was Thursday.

Susie: Tomorrow is Saturday.

David: I know that the day after tomorrow is not Friday.

If only one person's statement is true, what day of the week is it?

Answer: It is Wednesday. If it was any other day of the week, more than one statement would be true. To solve the riddle, evaluate each person's statement and write down what day it could be according to the statement. David's statement indicates it could be any day of the week except for Wednesday. When you list the days that it could be according to everyone's statement, it turns out Wednesday is the day mentioned only one time. Darryl: Sunday, Monday, Tuesday, or Wednesday Tracy: Monday Melissa: Saturday Ben: Thursday Adrienne: Saturday Susie: Friday David: Sunday, Monday, Tuesday, Thursday, Friday or Saturday
